PROFILE

Mechanical engineer focused on 3D CAD design, product development, and engineering simulation. Experienced designing components and assemblies in SolidWorks, validating them with structural and thermal FEA, and preparing manufacturing-ready documentation.

EXPERIENCE

Mechanical Design Engineer

2024 — Present

Company Name

- Designed and validated mechanical components in SolidWorks, from concept through manufacturing release.
- Ran structural and thermal FEA to confirm designs against performance requirements before tooling.
- Produced GD&T drawings and documentation for suppliers and internal manufacturing.

Mechanical Engineering Intern

2023 — 2024

Company Name

- Supported a product development team on CAD modeling and design-for-manufacturing reviews.
- Built parametric models and assembly configurations for a multi-variant product line.

EDUCATION

B.Sc. Mechanical Engineering

2020 — 2025

Your University

SKILLS & CERTIFICATIONS

CAD

SolidWorks, Fusion 360, AutoCAD

Simulation

SolidWorks Simulation, ANSYS

Engineering

Mechanical design, DFM, prototyping, technical documentation

Certifications

Certified SolidWorks Associate (CSWA)
